

DATA MINING IS DEFINED AS
EXTRACTING INFORMATION FROM
HUGE SETS OF DATA

They can either describe the **target dataset** or they can **predict outcomes** through use of **Machine Learning Alogorithm**

Process of discovering **interesting patterns** and knowledge **from large amounts of data**. It can include data warehouse, web, and other information **streamed into system**

Data Mining Process

In recent **data mining projects**, various major **data mining techniques** have developed and used
