

Unix (trademarked as **UNIX**) is a family of **multitasking, multiuser** computer operating systems

UNIX derive from the **original** AT&T Unix, whose **development** started in 1969 at the Bell Labs research **center** by Ken, **Dennis Ritchie**, and others.

The graphic features the word "UNIX" in large, bold, orange capital letters. Below it, the text "UNIPLEXED INFORMATION COMPUTING SYSTEM" is written in smaller, white, bold, capital letters. The background is dark gray with a subtle pattern of thin, light gray lines and small orange dots, resembling a circuit board or network diagram.

UNIX

**UNIPLEXED
INFORMATION
COMPUTING SYSTEM**

Unix distinguishes itself from its predecessors as the first **portable** operating **system**: almost the entire operating system is **written** in the **C programming language**, which allows Unix to operate on **numerous platforms**.
